To Whom It May Concern:

This letter is to give my highest recommendation for Zach Nickerson. Zach has been my student for the past two years where he has studied Computer Science. He has consistently shown an extremely high degree of motivation and commitment to his education. This commitment is critical in this field of study in which he has been highly successful. Zach has demonstrated this in that he consistently strives to go beyond the minimal requirements of all assignments.

It has been my observation that Zach has demonstrated excellent intellectual capacity and academic ability. He is a highly disciplined student and a real "self-starter". He has consistently shown a high level of self organization and demonstrated his ability to manage his time despite the rigorous academic load which he has taken on.

Zach has excellent communication skills and is equally at home giving a verbal presentation as well producing written work. His writing style is both clear and concise and verbal presentations are insightful and interesting.

In my program of study, Zach has studied Computer Science using Visual Basic.NET, Java, and C++. In this area of study, he has consistently excelled. In this course of study, he has concentrated on the science of algorithm development and program design. I have no doubt that he will continue to flourish in whatever endeavor he undertakes and be an asset to any student body.

Zach is also a very generous person and volunteered to assist in networking the Eventide Home which they successfully accomplished.

If you have any questions, please do not hesitate to contact me.
